

Lasdun, Denys Louis 1914 - 2001

Denys Louis Lasdun [commonly known as Denys Lasdun] was born in London, England, on 8 September 1914 and briefly studied at the Royal College of Music before deciding to pursue a career in architecture. He subsequently attended the Architectural Association Schools in London from 1932 to 1937. Whilst still a student he designed his first architectural work, a house in Oxshott, Surrey (1934), and from 1935 to 1937 collaborated with Wells Coates (1895-1958) on projects. His next significant architectural work was 32 Newton Road in Paddington, London (1937). The house, which was designed for the painter F. J. Conway, clearly shows the influence of Le Corbusier on Lasdun's thinking at this time.

In 1937 he joined the London architectural practice Tecton, founded by the Russian émigré modernist Berthold Lubetkin (1901-1990). During World War Two Lasdun served in the Royal Artillery and then in the Royal Engineers building airfields. He was also involved in the D-day landings. Following the war he went back to Tecton and was a partner in the firm from 1946 to 1948. In 1948-49 he taught at the Architectural Association and in 1949 he formed a partnership with Lindsay Drake (1909-1980) who had previously been a partner in Tecton. In 1952 Lasdun and Drake formed a partnership with Maxwell Fry (1899-1987) and Jane Drew (1911-1996) as Fry, Drew, Drake & Lasdun, partly in order to run Fry and Drew's office whilst they were engaged on work in Chandigarh, India. The partnership was dissolved in 1959 and the following year Lasdun established his own practice, Denys Lasdun & Partners (from 1978, Denys Lasden, Redhouse & Softley).

The 1960s was a particularly fruitful decade for Lasdun. He completed a building for the Royal College of Physicians (1960); the University of East Anglia in Norwich (1962-68); the redevelopment of areas of the University of London, including School of Oriental and African Studies, the Institute of Education, and the Institute of Advanced Legal Studies (1963); and the National Theatre (now Royal National Theatre) in London (1963-1976).

In 1976 Lasdun was knighted for his services to architecture and in 1977 was awarded the RIBA Royal Gold Medal. In 1991 he was elected a Royal Academician (RA).

Lasdun refused to retire and his practice was never formally wound up. He died in London on 11 January 2001.
