

Williams, Evan Owen 1890 - 1979

Evan Owen Williams was born in Tottenham, London, England on 20 March 1898. Whilst serving an apprenticeship with the Metropolitan Electric Tramways Company, he attended evening classes at the Northern Polytechnic Institute from where he graduated with a first-class honours degree in engineering in 1911. He then worked briefly for the Indented Bar and Concrete Engineering Company, and an architect and engineer for the Trussed Concrete Company in London from 1912 to 1916. In 1916–17 Williams worked for the Wells Aviation Company and in 1917-18 with the Admiralty where he explored the possibility of constructing concrete ships, something he was to return to during World War Two.

Following World War One, he opened an office in London and was in private practice from 1919 to 1939 when he commenced a partnership, first with T.S. Vardy, and later with O.T. Williams. He was consulting engineer for the British Empire Exhibition held in 1924-25.

From 1945 to 1969 he acted as Consulting Engineer for Motorway Construction to the Ministry of Transport from 1945 to 1969.

Williams received a knighthood for his services to architecture and engineering in 1924. He died in Hemel Hempstead, Hertfordshire on 23 May 1969.
