

Benson, William Arthur Smith (W.A.S.) 1854 - 1924

Benson, William Arthur Smith [often known as W.A.S. Benson] was born in London, England on 17 October 1854. He studied classics and philosophy at New College, Oxford University (1874-77), following which he was articled to the London architect Basil Champneys (1877-80). Nevertheless, he decided not to make a career in architecture, although he did later work on the occasional architectural project for family and friends.

In 1877 he became acquainted with Edward Burne-Jones, through whom he met William Morris, who encouraged Benson to become a craftsman. Early in 1880 he left Champneys and opened a small workshop in North End Road, Fulham, London. Initially, the workshop made furniture but following the hiring of John Lovegrove (1855-?), a skilled brass and copper-worker in 1881, Benson diversified into metalwork. Within two years, such was the success of the workshop that they moved into larger premises at Eyot Gardens in nearby Chiswick. About the same time, Benson also opened a studio and showroom at his house in Kensington.

In 1884 Benson was a founder member of the Art Workers Guild and was instrumental in establishing the Home Arts and Industries Association. Four years later, in 1888, he helped to establish the Arts and Crafts Exhibition Society (ACES), which provided an opportunity for craftsmen like himself to both exhibit and promote their designs. Benson, himself, participated in the 1st (1888), 3rd (1890), 6th (1899), 7th (1903), 9th (1910), 10th (1912), and 11th (1916) exhibitions of the ACES in London. Later, in 1915, Benson was also one of the

founding members of the Design and Industries Association.

In 1887 Benson moved his showroom from Kensington to premises at 82 Bond Street, London, and in 1889-90 expanded his workshop in Chiswick which was renamed the Eyot Metal Works.

By the 1890s Benson had acquired an international reputation for his metalwork which by then had extended to light fittings and a wide range of appliances and fittings for the home, all in the characteristic Arts and Crafts style, including fire screens and fenders, tableware, kettles, urns, etc.

A catalogue produced by the Benson in 1899-1900 listed over 800 items available from his firm. They also worked on commissions for individual clients such as the solicitor J.S. Beal, whose house, 'Standen' in East Grinstead, designed by Philip Webb, they equipped with electric lighting in the 1890s, making it one of the first houses to be fully electrified in Britain.

In 1899-1900 Benson installed the lighting in St Paul's Cathedral, London. During the 1890s Benson began designing furniture which was made by Morris & Co. and the London cabinetmaker J.S. Henry & Co.

In 1896, following the death of William Morris, Benson took over the directorship of Morris & Co. On 22 December 1900 the W.A.S. Benson Company was registered as a limited company.

During World War One, Benson utilised his company for the production of shells for the Ministry of Munitions and equipment for the launching of torpedoes for the Admiralty.

Benson sold off his company in 1920 and retired to Castle Corner, a house in Manorbier, Wales, which he and his wife had purchased in 1909 and where he died on 5 July 1924.
