

## Hardwick, Philip Charles 1822 - 1892

Philip Charles Hardwick was born in Westminster, Middlesex [now London], England on 12 September 1822. Both his father, [Philip Hardwick](#) (1792-1870) and his grandfather, Thomas Hardwick (1752-1825) were architects. He trained in the office of Edward Blore (1787-1879) and of his father in London. He subsequently worked both independently and with his father, although they were not partners. Like his father, much of his work was in the City of London where he designed a many banks and banking offices. He also designed a number of public schools, notably Charterhouse in Godalming, Surrey and St. Edmunds in Canterbury, Kent; and several country houses. The building for which he is probably best known is Great Hall of London's Euston railway station.

In 1852 he took over his father's practice. He was Architect to the Bank of England, St. Bartholomew's Hospital, the Merchant Taylor's Company, Greenwich Hospital, and Charterhouse School. He was elected a Fellow of the Royal Institute of British Architects (FRIBA) in 1850. Between 1848 and 1854 he exhibited regularly at the Royal Academy in London.

Arthur William Blomfield (1829-1899) was one of Philip Charles Hardwick's pupils.

Hardwick died at his home, 2 Hereford Gardens, Park Lane, London on 27 January 1892
