

Arcon 1943 - ?

Arcon was an architectural firm established in Britain in 1943 by George Edric Neel (1914-1952), Raglan Squire (1912-2004) and Rodney Thomas (1912-2003). They were joined later that year by Arthur Middleton Gear (1911-1995). During the 1940s Arcon was at the fore of architectural firms that developed prefabricated buildings to meet the post-war housing need.

The company designed several stands for the 'Building Exhibition' at Olympia in London in November 1947 including those for ICI, B. Finch & Co. Ltd., Ascot Gas Water Heaters Ltd., Celotex Ltd. and Williams & Williams. They also designed a stand for Frigidaire at the 1950 Ideal Home Exhibition.

In the late 1940s and early 1950s Arcon, in collaboration with Taylor Woodrow Construction, also designed a range of 'demountable' furniture for the Overseas Food Corporation. The furniture was made using hardwood from Tanganyika. A photograph of 'demountable' furniture in muninga designed for the Overseas Food Corporation by Arcon in collaboration with Taylor Woodrow Construction Ltd. is illustrated in 'Decorative Art' 1951-52 (p.34).

Squire left the practice 1948 to work in Rangoon. Thomas was responsible for the design of the Transport Pavilion at the Festival of Britain 1951.

Worked in

UK
